

July 1, 1958

Dr. H. C. Urey
Department of Chemistry
University of Chicago
Chicago 37, Illinois

Dear Dr. Urey:

I would be grateful for reprints of your papers, and any others by Dr. Donn that bear on the molecular composition of the interstellar material and of the lunar surface.

Yours sincerely,

Joshua Lederberg
Professor of Medical Genetics

P.S. I am sorry I had no occasion to visit and meet you in Chicago in connection with our paper that came out in this week's Science. I am sure there are many lacunae that you could fill; our effort reflected the second insight and interest of biologists.

UREY, H.

UREY
